Symfony Developer at Brainstream Technolabs with 2 years of hands-on experience, adept at crafting scalable web applications and REST APIs. Expert in PHP and Doctrine ORM, with a strong focus on performance optimization and security best practices. Known for a collaborative approach and strong problem-solving skills that drive successful project outcomes in fast-paced, dynamic environments.

EDUCATION

Silver Oak University **2022 – 2026**
Bachelor of Technology in Computer Science & Engineering *Ahmedabad, Gujarat*
CPI: **9.47**

EXPERIENCE

Symfony Developer **Jul 2023 – Present**
Brainstream Technolabs *Ahmedabad, Gujarat*

- Developing and maintaining scalable web applications using PHP & Symfony
- Building REST APIs, business logic, and database-driven modules using Doctrine ORM
- Working on subscription systems, HRMS, and sports-based platforms
- Implementing JWT authentication, role-based access, and security best practices
- Optimizing application performance and database queries
- Collaborating with frontend teams using Git-based workflows

PROJECTS

Nachos TV – Video Streaming Platform | PHP 7.3, Symfony 3.4, MySQL

- Maintained and enhanced an existing Netflix-like subscription-based video streaming platform
- Upgraded platform components and fixed critical bugs to improve stability and performance
- Enhanced and maintained secure monthly subscription workflows using Stripe and PayPal
- Improved admin dashboard features for managing content, users, and subscriptions

Enterprise HR Management System (HRMS) | PHP 8.2, Symfony 7.2, MySQL

- Architected a modern enterprise-grade HRMS using Symfony 7.2
- Implemented complex payroll logic including salary, tax, arrears, and extra pay
- Built employee lifecycle modules including attendance, assets, and project management
- Integrated real-time UX using Symfony UX (Turbo, Stimulus)

Pickatm – Sports Prediction Platform | PHP 8, Symfony 6, MySQL

- Developed sports prediction engine supporting Parlays, Teasers, and contests
- Built rewards and cash-out system with secure transaction handling
- Optimized large-scale database schema with 100+ entities

B2battle – Esports Tournament Platform | PHP 8.2, Symfony 7.3, React 19, MySQL

- Designed and developed a full-scale esports tournament platform (<https://www.b2battle.in/>)
- Built backend APIs using Symfony 7.3 and frontend using React 19
- Implemented tournament creation, room management, and virtual game ID sales
- Integrated **Razorpay** and **Cashfree** payment gateways for secure transactions
- Developed custom room logic and automated match workflows

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL, HTML, CSS

Frameworks: Symfony, REST APIs, React

Developer Tools: Git, GitHub

Databases: MySQL

Libraries / ORM: Doctrine ORM
