Symfony Developer at Brainstream Technolabs with 2 years of hands-on experience, adept at crafting scalable web applications and REST APIs. Expert in PHP and Doctrine ORM, with a strong focus on performance optimization and security best practices. Known for a collaborative approach and strong problem-solving skills that drive successful project outcomes in fast-paced, dynamic environments.

EDUCATION

Silver Oak University

Bachelor of Technology in Computer Science & Engineering

CGPA: **9.50**

2022 – 2026

Ahmedabad, Gujarat

EXPERIENCE

PHP Intern

Brainstream Technolabs Pvt. Ltd.

Jul 2023 – Mar 2024

Ahmedabad, Gujarat

- Learned HTML, CSS, Bootstrap, JavaScript, jQuery, PHP, and Git during internship training
- Worked with PHP-based frameworks and backend development fundamentals
- Assisted in bug fixing, API integration, and database operations
- Learned Git workflows, REST APIs, and MVC architecture
- Supported senior developers in feature development and testing

Symfony Developer

Brainstream Technolabs Pvt. Ltd.

Apr 2024 – May 2026

Ahmedabad, Gujarat

- Developing and maintaining scalable web applications using PHP & Symfony
- Building REST APIs, business logic, and database-driven modules using Doctrine ORM
- Working on subscription systems, HRMS, and sports-based platforms
- Implementing JWT authentication, role-based access, and security best practices
- Optimizing application performance and database queries
- Collaborating with frontend teams using Git-based workflows

PROJECTS

PicClarityAI – Image Enhancement Platform

| Python, FastAPI, React 18, PyTorch

- Developed AI-powered image restoration and super-resolution platform using FastAPI and PyTorch
- Integrated GFPGAN and Real-ESRGAN models for face enhancement and 4x/6x upscaling
- Built asynchronous AI processing pipelines with responsive React frontend

RelphaCare – Digital Content & Wellness Platform | PHP 8.2, Symfony 7.4, MySQL, Stripe, AWS S3

- Developed a subscription-based wellness and digital storytelling platform using Symfony 7.4
- Built scalable APIs for episode management, user progress tracking, and creator engagement workflows
- Integrated Stripe subscriptions, webhook automation, and AWS S3 media storage for secure content delivery

PDFConvertCloud.in – Online Developer Tools

| PHP 8.2, Symfony 7.2, Twig, MySQL, Vanilla JS

- Developed an SEO-focused multi-tool platform offering PDF, JSON, JWT, Regex, SQL, and developer productivity utilities
- Architected a centralized tool management system for dynamic pages, sitemap generation, and SEO content workflows
- Implemented PDF processing using FPDI, frontend utilities in Vanilla JS, and production-ready deployment pipelines

Enterprise HR Management System (HRMS)

| PHP 8.2, Symfony 7.2, MySQL

- Architected enterprise-grade HRMS modules using Symfony 7.2
- Implemented payroll, attendance, asset, and employee management systems
- Integrated real-time user interactions using Symfony UX (Turbo, Stimulus)

PDFConvertCloud.com – PDF & Audio Processing Platform | Java 17, React 19, MySQL

- Built a full-stack media processing platform supporting PDF, audio, and Office document conversion workflows
- Developed scalable REST APIs for merge, split, compress, trim, convert, and editing operations
- Integrated Apache PDFBox, Apache POI, JODConverter, LibreOffice, and FFmpeg for advanced media processing pipelines

Nachos TV – Video Streaming Platform | PHP 7.3, Symfony 3.4, MySQL

- Enhanced and maintained a subscription-based video streaming platform
- Improved platform stability, performance, and subscription workflows using Stripe and PayPal
- Developed admin features for content, user, and subscription management

CVBuilderAI – Resume Builder Platform | Next.js 15, TypeScript, Tailwind CSS, Zustand, jsPDF

- Developed a dynamic resume builder with pixel-perfect A4 rendering and high-fidelity PDF export support
- Architected modular template systems with real-time theme switching and live editing capabilities
- Built intelligent pagination and export pipelines using html2canvas and jsPDF for multi-page resume generation

B2battle – Esports Tournament Platform | PHP 8.2, Symfony 7.3, React 19, MySQL

- Designed and developed a scalable esports tournament platform
- Built tournament management APIs, room systems, and virtual game ID workflows
- Integrated Razorpay and Cashfree payment gateways with automated match logic

Centsports – Sports Prediction Platform | PHP 8, Symfony 7, MySQL

- Developed sports prediction engine supporting Parlays, Teasers, and contests
- Built rewards and cash-out system with secure transaction handling
- Optimized large-scale database schema with 100+ entities

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, SQL

Backend Frameworks: FastAPI, Symfony

Frontend: React.js, HTML5, CSS3

Databases: MySQL

ORM / Libraries: SQLAlchemy, Doctrine ORM

Tools & Platforms: Git, GitHub, Docker, Linux

Backend Development: REST APIs, JWT Authentication, Payment Gateway Integration,
